richbothe.com

SUMMARY

Front-end developer seeking a fully remote role. Nearly 20 years developing, the last 9+ building accessible, data-driven web apps for the public, specializing in reactive and GIS applications. Experienced working both fully remote and hybrid, with clear communication, end-to-end ownership, and Jest-tested, reusable code that teammates can pick up.

Selected work: richbothe.com/work (case studies: seven maps on ArcGIS 4.x, jQuery to Vue, and Mojo Portal to Umbraco)

TECHNICAL SKILLS

Front-end	JavaScript (ES6+), TypeScript, HTML5, CSS3, Vue.js with Pinia, Bootstrap
GIS & mapping	ArcGIS API for JavaScript, GIS and mapping applications
CMS & data	Umbraco CMS, REST APIs, JSON, Google Tag Manager, SiteImprove
Tooling & quality	Node.js, Git, Azure DevOps, Adobe Workfront, VS Code, Vite / Webpack, Jest, Playwright, WCAG accessibility, responsive design, AI-assisted development

PROFESSIONAL EXPERIENCE

Front-End Developer, Metro Transit

JUNE 2017 – PRESENT

Minneapolis, MN

- Lead the modernization of transit tools from legacy jQuery and Bootstrap 4.x to Vue.js and Bootstrap 5.3.
- Technical lead on the migration from the legacy Mojo Portal CMS to Umbraco CMS.
- Develop GIS web applications with the ArcGIS API for JavaScript: real-time trip planning, vehicle tracking, and park & ride and stop & station finders.
- Build Vue components shared across trip tools including Trip Planner, NexTrip, and Schedules & Maps among others.
- Integrate REST APIs and geospatial services for dynamic, location-aware experiences.
- Improve performance, accessibility (WCAG) and mobile responsiveness.
- Maintain unit and end-to-end tests and coverage with Jest and Playwright, and automate workflows with a Git CI/CD pipeline.
